To the United Nations (UN)

I, TIAGO VENTURA COSTA, a Brazilian citizen, hereby respectfully submit this formal complaint to the United Nations, requesting the initiation of an international inquiry into facts which, according to existing technical and material evidence, constitute serious violations of International Law, International Space Law, and the International System for the Protection of Human Rights.

It is alleged that the North Atlantic Treaty Organization (NATO), through military and industrial structures associated with it, has been engaged in the manufacture and operation of neuromodulators embedded in satellites, which, when used in combination with Directed Energy Weapons (DEWs), are capable of producing direct effects on human cognition. Such effects allegedly include direct control of will, induction of complex beliefs, implantation of specific thoughts, coercive psychological persuasion, behavioral conditioning, prolonged social manipulation, and mechanisms of coercion based on deprivation, reinforcement, and neuropsychological punishment.

It is further alleged that these systems allow active access to and operational interaction with aerospace infrastructure, thereby characterizing an offensive military use of outer space, with direct and indirect impacts on individuals and civilian populations on Earth. The existence and operation of such systems would represent a substantial deviation from the principle of the peaceful use of outer space, as established under the current international legal regime.

According to the available evidence, a specific military-grade device, whose manufacture is attributed to NATO, and which is capable of accessing and operating the aforementioned neuromodulatory aerospace infrastructure, is currently in the possession of a criminal faction established in the State of Rio Grande do Sul, Federative Republic of Brazil. The device is allegedly located at Rua Garibaldi, No. 954, Apartment 52, Bairro Independência, Porto Alegre, Brazil, and is being held and potentially operated outside any lawful state control.

It is further alleged that the country of origin of the equipment is the Italian Republic, and that it was misappropriated and illicitly transported from Italy to Brazil by LYVIA MOREIRA DE OLIVEIRA, with its current possession attributed to ISMAEL HOMEM DE OLIVEIRA. These circumstances indicate serious failures in control, traceability, and custody mechanisms for strategic military technology, as well as potential international responsibility arising from omission or negligence.

The manufacture, misappropriation, possession, and alleged operation of such systems constitute, in principle, violations of the 1967 Outer Space Treaty, particularly the obligation to ensure the peaceful use of outer space and the prohibition against employing space-based objects for hostile purposes against the Earth and humanity. They may also constitute violations of the Convention on International Liability for Damage Caused by Space Objects, insofar as direct or indirect harm to human beings is concerned.

From a human rights perspective, the use of technologies capable of coercively interfering with human will, thought, and behavior constitutes a violation of the Universal Declaration of Human Rights, notably with respect to human dignity, freedom of thought, conscience and opinion, physical and psychological integrity, and the right to personal security. It further constitutes a violation of the International Covenant on Civil and Political Rights, particularly Article 7, which prohibits torture and cruel, inhuman or degrading treatment, and Article 18, which protects freedom of thought. Such practices may also qualify, in principle, as psychological and neurotechnological torture under the Convention against Torture and

Other Cruel, Inhuman or Degrading Treatment or Punishment.

The systemic gravity of the facts described lies in the precedent they establish for the weaponization of neuroscience, the direct threat posed to cognitive self-determination, the risk of covert population manipulation, and the severe compromise of international collective security, especially in light of access to such capabilities by non-state criminal actors.

In light of the foregoing, I respectfully request the initiation of an independent international investigation, with the participation of the OHCHR and UNOOSA; the formal notification of NATO and the Italian State for clarification and accountability; the adoption of urgent measures for the containment, seizure, and neutralization of the aforementioned equipment; the determination of international, state, and individual responsibility; and the promotion of an international debate aimed at the classification and potential prohibition of neurotechnological and coercive neuromodulation weapons, due to their incompatibility with human dignity and the preservation of the international legal order.

Respectfully submitted,

TIAGO VENTURA COSTA
Brazilian Citizen
